

ALL THE PERKS OF FISH, NONE OF THE POUTS

As a parent, you already know that pickiness, when it comes to food, is just part of being a kid. And because of their finicky natures, many children don't get enough of the important omega-3 fatty acids found in cold-water, deep-sea fish. A quality supplement like USANA's **BiOmega Jr.** fish oil supplement can make it fun and easy for kids to get the DHA (docosahexaenoic acid) and EPA (eicosapentaenoic acid) to support their growing minds and bodies.

BiOmega™ Jr.— Not Just Another Fish in the Sea

BiOmega Jr. not only provides optimally balanced, concentrated omega-3s, it also contains added vitamin D. Important for cellular function, omega-3s have been shown to support healthy brain and eye development, while vitamin D supports strong teeth and bones.

The whole family won't hesitate to reel in this delicious orange-pineapple flavoured gel that's fun to eat straight from the pack or mixed into cold, creamy foods. It's the ultimate catch!

Item #144
\$17.50 Autoship
